

Flood Control Fire-Related Sediment Hauling

LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS

NOTICE

WHY ARE THERE BIG TRUCKS IN THE NEIGHBORHOOD?

To safeguard lives and property during this period of increased mudflow risk for local burn areas, LA County Public Works is conducting emergency clean-out operations at six debris basins in the North San Fernando Valley. Material removed from these facilities is being trucked to the County's Dunsmuir Sediment Placement Site in Glendale.

HOW LONG WILL THE WORK LAST?

The current operation is winding down; truck trips are expected to decrease dramatically until the work is completed in mid-March. However, as part of routine facility maintenance, a visible County presence and occasional truck hauling will continue throughout the current storm season and until the burn area watersheds have recovered. Additional maintenance and clean-out activities may be necessary depending on the severity of future storms.

HOURS/DAYS

County crews will work from 7 a.m. to 5 p.m., Monday through Friday, and on Saturdays as needed, during the storm season.

TRUCK HAUL ROUTES

WHERE DO THE TRUCKS GO?

Trucks routes are illustrated on the attached map. Safety is Public Works' highest priority, and truck hauling operations are carefully monitored by County staff to ensure that drivers navigate their routes safely and observe all traffic laws. If you see a truck that is not observing traffic laws, please contact Public Works' 24-hour Dispatch Center at **(800) 675-HELP (4357)**.

RESIDENT SUPPORT

To expedite their operations, County crews require unobstructed access to County facilities. **Please avoid parking vehicles or storing materials on streets near the Dunsmuir Sediment Placement Site during hauling operations. Parking restrictions (if necessary) will be posted 48 hours in advance.**

WHO CAN I CALL WITH QUESTIONS OR CONCERNS?

LA County appreciates your patience and understanding during storm season. If you have questions about maintenance activities or would like to report a concern, contact the project manager below during business hours or call Public Works Dispatch at **(800) 675-HELP (4357)**.
